Summary Report

This report summarizes I-LIDS monitoring and review activity at the boat launch for 2023.

I-LIDS Summary Data

Date Installed Date De-installed Videos Captured Videos Reviewed by ESP Total Videos Reviewed Launches counted % of boat launch videos ¹ Suspect AIS Violations Hours of operation Total hours of inspection time

Observations:

Recommendations:

¹ The number of videos is always greater than the number of launches. If there is a magnetic sensor, it will trigger the camera to look for motion for 120 seconds. During this time, any activity (inspection, tie-downs, people moving, cloud movement, etc.) in front of the camera will trigger another video. Infrequently, the magnetic sensor may trigger randomly, or vehicle movement behind the sensor may set up the camera for additional video capture. If there's no magnetic sensor, the camera simply looks for sufficient motion and will capture a video.
